

## AUTOMATED CALL CONNECTION SYSTEM

### ABSTRACT OF THE DISCLOSURE

5        A method and system are provided for automatic call connection. A call back request is initiated by a first user and then sent to a second user. After the call back request is received by the second user, the second user is given the option of accepting or rejecting the call back request. If the second user accepts the call back request, then the first user is automatically connected to the second user.
